

### 7" GEMmodule™

## STK-070R Rev A

# **Data Sheet**

#### Introduction:

The STK-070R Rev A is a fully integrated 7" WVGA production color display module to support a variety of embedded control interface applications. Featuring the Amulet GEM Graphical OS Chip™ for color displays, the module can be easily programmed using GEMstudio™, the easiest GUI design tool in the embedded space.

#### Fuatures:

- 800x480 WVGA TFT LCD
- White LED backlight
- Integrated resistive touch panel
- Amulet GEM Graphical OS Chip™
- 24 Pin Interconnector
- Royalty-free Graphical Operating System<sup>™</sup>
- On-Board memory 64Mb Serial Flash for storing GUI pages
- Touch Panel Controller Built into Graphical OS Chip™
- Color Supported Palettized 8bit (1-bit alpha)
- Backlight can be controlled via the touch panel or external command
- Supports Unicode Foreign language character sets
- · Font Converter Built-in

## **General Specification**

| ITEM                                  | STANDARD VALUE             | UNIT  |
|---------------------------------------|----------------------------|-------|
| Pixels (Resolution)                   | 800 X 480                  | dots  |
| Outline dimension                     | 164.9(H) x 100(V) x TBD(D) | mm    |
| Active area                           | 154.8(H) x 85.92(V)        | mm    |
| Pixel Size                            | 0.1929 x 0.179             | mm    |
| Luminance                             | 350 Typ.                   | Cd/m2 |
| Operation Temp.                       | 70 - 20                    | С     |
| \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ | 10.0/6/                    | 1     |

| View Angle        | 12 O'Clock         |  |
|-------------------|--------------------|--|
| Display Mode      | TM, NW             |  |
| Backlight         | 24 White LED       |  |
| Backlight Control | PWM                |  |
| Data Flash        | 64 Megabit         |  |
| Interface         | USB / RS232 / UART |  |

# **Electrical Characteristic**

## **Recommended Operating Conditions**

| 5V         | 5V Recommended |
|------------|----------------|
| 5V Current | TBD Min        |

#### **DC** Characteristics

| V core Supply Current  | 22mA @1.2V          |
|--|---------------------|
| V input Low Level  | -0.3 to 0.8V        |
| V input High Level   | 2V to (Vcc + 0.3V ) |
| Pull Up Resistors  | 70K to 175KOhms     |
| IO Output Current  | 8mA                 |
| Static Current Excluding Power on Reset V core = 1.2V  | 600uA               |
| Static Current Logic cells consumption, including Power on Reset and all input drivers V core = 1.2V | 30uA                |

## **Pin Descriptions**

Pin Type
I = Input
O = Output
P = Power Supply

| Pin # | Signal    | Туре | Description                                       |
|-------|-----------|------|---|
| 1     | 5V        | Р    | 5V @ 300mA  |
| 2     | 5V        | Р    | 5V @ 300mA  |
| 3     | GND       | Р    | Ground  |
| 4     | GND       | Р    | Ground  |
| 5     | SCL       | 0    | Serial Clock                                      |
| 6     | SDA       | 0    | Serial Data                                       |
| 7     | COMMU RXD | I    | CommU RXD UART                                    |
| 8     | COMMU TXD | 0    | CommU TXD UART                                    |
| 9     | PWM 1     | 0    | Programmable Clock 1                              |
| 10    | PWM 2     | 0    | Programmable Clock 2                              |
| 11    | Prog M    | I    | Program Mode - Float = Prog / GND = Run Note:1    |
| 12    | PWM 0     | 0    | Programmable Clock 0                              |
| 13    | RS232 TXD | 0    | TXD from RS232 Transceiver                        |
| 14    | T_CAL     |      | Touch Panel Cal Float = Cal / GND = Normal Note:1 |
| 15    | PROGU RXD |      | PROGU RXD UART                                    |
| 16    | PROGU TXD | 0    | PROGU TXD UART                                    |
| 17    | SPI C3    | 0    | SPI Chip Select 3                                 |
| 18    | RS232 RXD | I    | RXD from RS232 Transceiver                        |
| 19    | SPI C2    | 0    | SPI Chip Select 2                                 |
| 20    |           |      |   |
| 21    | MISO      | 0    | SPI DATA In                                       |
| 22    | SCLK      | 0    | SPI Clock   |
| 23    | RESET     | 0    | System Reset by driving pin low                   |
| 24    | MOSI      | 0    | SPI DATA Out                                      |

Note:1 Internally pulled up. Only pull to ground

### **J3 Wiring**

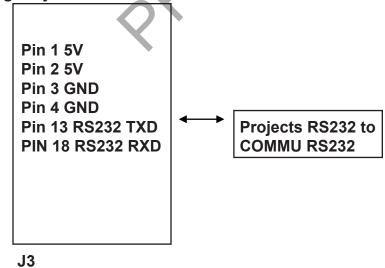

### **Connecting Project via UART**

J3

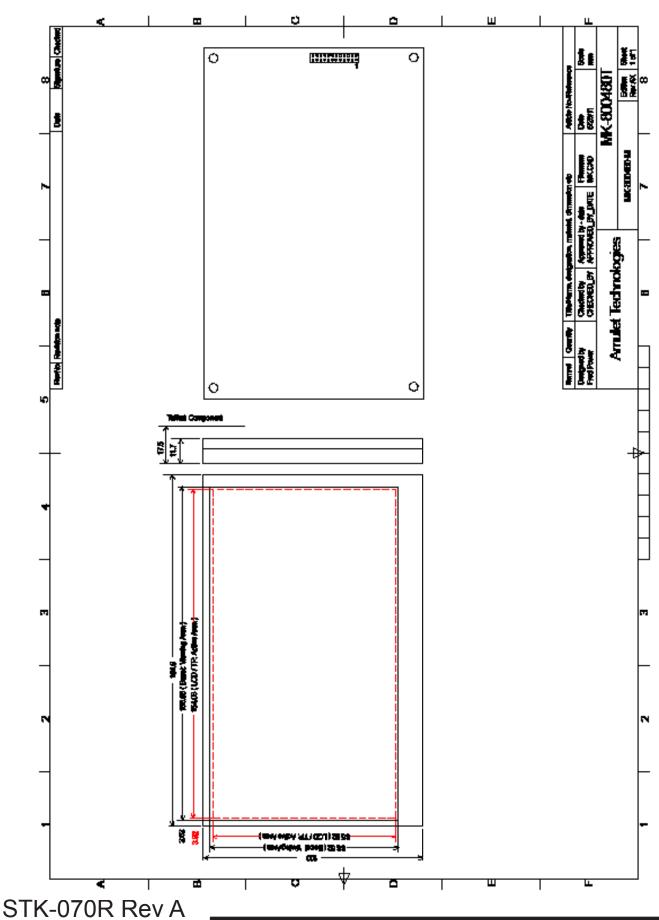

Note: Cut Trace across SD and Jumper "D" side to C38 "8" side GND to take the RS232 Tranceiver out of circuit.

## **Connecting Project via RS232**

Datasheet 1.1 - 0612

#### Notes:

Communication and Program UARTs can be used for programming as well as for communication with the application's host processor.

If you wish to program via UART make sure you can get to the Reset and the Program Mode pins. These will only be needed if a serious programming issue occurs.

Pass-Through Programming information is available at our website under Field Update Utilities: http://www.amulettechnologies.com/support/downloads/fieldupdates.html.

Momentarily grounding reset with an open collector device or momentary switch will cause a reset. Reset must be applied after the Program Mode pin is changed for us to see it.
