<p>MEASUREMENT CIRCUIT DIAGRAM OF RETURN LOSS</p> <p>The diagram shows two 'PORT V(F)' boxes connected to a central 'HARNESS' box. The harness is labeled 'D.U.T.' (Device Under Test). On either side of the harness are 'SMPMP(FD)-HVP' connector boxes. A double-headed arrow below the harness indicates its length.</p>

NOTE 1 Semi-flexible coaxial cable is used in the assembly product, and the junction of the cable and the connector is soldered. If excess stress was applied to the junction, the stress might give damage like the crack of shield part to the product. Please be careful of handling.

【 RECAUTION FOR HANDLING 】

Extraction and insertion of a SMPM connector. Please extract and insert the connector straightly by aligning the mating axes of both connectors. If the connector was extracted or deterioration of the spring portion of outer contact.

RoHS COMPLIANT
