# Product Specifications

Type: Polymer Li-ion Rechargeable Battery

Model: <u>DTP 702248</u>

Specification: 3.7V/700mAh

### 1. Scope

This specification shall be applied to the batteries from Data Power Technology Limited's product.

### 2. Product Type and Product Model

**2.1 Type:** Polymer Li-ion Recharged Battery

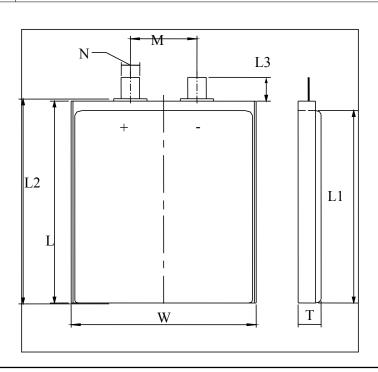

**2.2 Model:** DTP 702248

### 3. Product Basic Characteristics

| No   | Item                                 | Characteristics   |
|------|--------------------------------------|---|
| 3.1  | Rated Capacity                       | 700mAh  |
| 3.2  | Minimum Capacity                     | 700mAh  |
| 3.3  | Nominal Voltage                      | 3.70V   |
| 3.4  | Charge Limited Voltage               | 4.20V   |
| 3.5  | Discharge Cut-off Voltage            | 2.75V   |
| 3.6  | End-of-charge Current                | 0.01C   |
| 3.7  | Standard Charge                      | Charge with 0.2C(140mA) up to Limited Voltage, Charge with            |
| 3.7  | Standard Charge                      | limited Voltage up to end-of-charge current.                          |
| 3.8  | Standard Discharge                   | Using 0.2C(140mA) constant current discharge to the Discharge Cut-off |
| 3.0  | Standard Discharge                   | Voltage.  |
| 3.9  | Maximum Continuous Charge Current    | 0.5C (350mA)  |
| 3.10 | Maximum Continuous Discharge Current | 0.5C (350mA)  |
|      | Operating Temperature Range          | Charge 10 ~ 45 °C   |
| 3.11 | Operating reinperature Range         | Discharge $-20 \sim 60 ^{\circ}\text{C}$                              |
|      | Storage Temperature Range            | -20 ~ 60°C  |
| 3.12 | Operating And Storage Humidity Range | 65 ± 20% RH   |
| 3.13 | Weight                               | Less than 18 g  |

### 4. Cell Dimension

| Item | Dimension (mm) |
|------|----------------|
| Т    | Max 7.0        |
| W    | Max 22.0       |
| L    | Max 47.5       |
| L1   | Max 44.0       |
| L2   | Max 48.0       |
| L3   | 6.5±0.5        |
| М    | 10.0±1.0       |
| N    | 3.0±0.1        |

File.No: E-SPE-0135-01

Ver:00 Page: 5/10

Date: 2017-05-23

#### 5.Appearance

It shall be free from any defects such as remarkable scratches, breaks, cracks, discoloration, leakage, or middle deformation

#### **6. Basic Electrical Characteristics**

| No. | Items                                | Criteria  | Test Method   |
|-----|--------------------------------------|---|---|
| 6.1 | Open Circuit<br>Voltage              | 3.75V~3.95V   | Measure with voltmeter.   |
| 6.2 | $  > 1 \times 180 \text{m}\Omega$    |   | Measure cells using an alternate current impedance meter at 1kHz.   |
| 6.3 | Rated Capacity (0.2C <sub>5</sub> A) | ≥700mAh   | Discharged after the standard charged cells rest 10min at 23±2°C, Test can be discontinued when more than Rated capacity. Three cycles are permitted  |
| 6.4 | 1C <sub>5</sub> A.discharge capacity | ≥700mAh×90%   | Discharged after the standard charged cells rest 10min at $23\pm2^{\circ}\!$  |
| 6.5 | Temperature<br>Characteristics       | <ol> <li>Appearance:</li> <li>No deformation \( \cdot \) ruptures nor leakage \( \cdot \)</li> <li>Discharge Capacity:</li> <li>55°C: ≥85% \( \times \) initial capacity;</li> <li>-10°C: ≥60% \( \times \) initial capacity</li> </ol> | Measured the 0.2C5A capacity at $23\pm2^{\circ}$ C as the initial capacity. Stored the rechargeable batteries for 16-20hrs at $-10\pm2^{\circ}$ C; 2h for $55\pm2^{\circ}$ C, and then 0.2C5A discharged at this temperature, Checked the batteries' appearance after rest for 2 hrs at room temperature. |
| 6.6 | Storage<br>Characteristics           | Retention Capacity:<br>≥85% ×initial capacity   | Measured the $0.2C_5A$ capacity at $(20\pm5)^{\circ}C$ as the initial capacity. Stored the recharged cells for 6 days at $20\pm5^{\circ}C$ and then rest for 2 hrs at room temperature, $0.2C_5A$ discharged after checked the cells' appearance.   |
| 6.7 | Cycle Life (20°C)                    | Capacity≥initial capacity× 80%  | 0.2C discharged after 0.2C <sub>5</sub> A full charges at 20± 5°C.Carry out 300 cycles  |

Remark 1 Standard charge: 0.2C<sub>5</sub>A charge up to charge limited voltage at (20±5)°C. Charge with limited voltage up to end of current. It is the same to the next content

### 7. Safety Characteristics

| No. | Items           | Criteria                      | Test Method   |
|-----|-----------------|-------------------------------|---|
| 71  | •               | Appearance: No rupture, fire, | When the battery is fully charged, go on loading for 8h with a twice rating voltage, 2.0C <b>5</b> A out put current, it starts |
|     | Characteristics | smoke, nor leakage.           | the over charge protection function.  |

File.No: E-SPE-0135-01

Date: 2017-05-23

|     |                                   |                           | The battery is discharged at 0.2C <b>5</b> A in the constant current till it                                   |
|-----|-----------------------------------|---------------------------|--|
| 7.2 | Over-discharge<br>Characteristics | Appearance: No rupture,   | reaches over discharge protection voltage at (20±5) °C, connected  |
|     |                                   | fire, smoke, nor leakage. | with a $30\Omega$ lead and discharged for 24h  |
|     |                                   |                           | As the battery has completed charging, short circuit the positive  |
|     | Short-circuit                     | OCV ≥3.6V;                | and negative contacts with $0.1\Omega$ resistor for 1h for appearance  |
| 7.3 | Characteristics                   | Appearance: No rupture,   | check, then disconnect the resistor between the contacts, the  |
|     | Characteristics                   | fire, smoke, nor leakage. | battery shall be charged at 1.0C5A mA in the constant current for  |
|     |                                   |                           | 5S   |
|     |                                   |                           | The battery is to be heated in a gravity convection  |
|     | Hot Oven                          | Appearance:No             | or circulating air oven after standard charged at  |
| 7.4 |                                   | explode.No fire.          | $23\pm2^{\circ}\mathrm{C}$ ,The temperature of the oven is to be raised at a rate of $5\pm2^{\circ}\mathrm{C}$ |
|     | Characteristics                   | explode. No life.         | /min. The oven is to remain for 30 minutes at  |
|     |                                   |                           | 400±2°C before the test is discontinued.   |
| 7.5 | Heavy                             | Appearance:.No            | Putting the battery on the platform, using 10KG heavy hammer free  |
| 1.3 |                                   |                           | drop from 1M height onto the fixed battery.  |

# Remark 2 All safety characteristics are carried out by specialized personnel familiar with Li-ion knowledge or under instruction of our technical personnel after detailed consultation.

### 8. Reliability Characteristics

| No. | Items   | Criteria   | <b>Test Method</b>  |  |  |
|-----|---|--|---|--|--|
| 8.1 | Static Humidity<br>and Temperature<br>Characteristics | Retention Capacity:  ≥60%× initial capacity  Appearance: No leakage, damage ,smoke, ruputer. | Measured the 1C5A capacity at 23±2 °C as the initial capacity. Stored the rechargeable batteries for 2 days at 40 ± 2 °C and 90%-95%RH, then rest for 2 hrs at room temperature. 0.2C5A discharged after checked the batteries appearance. Measured recoverable 1C5A discharge capacity with 3 cycles |  |  |
| 8.2 | Vibration<br>Characteristics                          | OCV ≥3.6V;<br>Appearance: No fire, leakage,<br>explode, rupture                              | After fully charging, fixing the battery onto the vibration platform. with amplitude 0.38mm circularly scanning vibrating in the frequency of 10HZ-55HZ from three directions X \ Y \ Z for 30min respectively in its scanning frequency velocity 10CT/min.   |  |  |

|       |                      |                               | After vibration testing, use a clip or directly fix the    |
|-------|----------------------|-------------------------------|--|
|       |                      |                               | battery on to the platform in the direction of X 、Y 、Z     |
|       | - Pumn               | OCV ≥3.6V;                    | vertical complementary axis, then adjust its               |
| 8.3   | Bump Characteristics | Appearance: No fire, leakage, | acceleration and pulse duration as below to have a         |
|       | Characteristics      | explode, rupture              | bump test. Pulse peak acceleration 100m/s2. Bumps          |
|       |                      |                               | per minute 40-80.Pulse duration 16ms. Bump times           |
|       |                      |                               | 1000±10.   |
|       |                      |                               | After bump testing, the battery shall be immediately       |
|       |                      | Retention Capacity:           | dropped from the height of 1000mm (minimum height)         |
| 8.4 F | Free Drop            | ≥85% ×nominal capacity.       | onto a 18mm $\sim$ 20mm hard board on the cement floor.    |
|       | Characteristics      | Appearance: No fire, leakage, | Free drop one time respectively from X 、Y 、Z positive      |
|       |                      | explode, rupture              | and negative axis(six directions). After that, the battery |
|       |                      |                               | is discharged at 1C5A to its final voltage.                |

### 9. Assembling Request

### 9.1 List of Parameter

| Item                      | Symbol                | Content                             | Criterion              |
|---------------------------|-----------------------|-------------------------------------|------------------------|
|                           | $V_{DET1} \\$         | Over charge detection voltage       | 4.300V±0.050V          |
| Over charge Protection    | $tV_{\text{DET1}} \\$ | Over charge detection delay time    | 80 ms                  |
|                           | $V_{\text{REL1}}$     | Over charge release voltage         | 4.100±0.050V           |
|                           | $V_{\mathrm{DET2}}$   | Over discharge detection voltage    | 2.4V±0.100V            |
| Over discharge protection | $tV_{\mathrm{DET2}}$  | Over discharge detection delay time | 20ms                   |
|                           | $V_{REL2}$            | Over discharge release voltage      | 3.0V±0.100V            |
|                           | $V_{\mathrm{DET3}}$   | Over current detection voltage      | 0.150±0.030V           |
| Over current protection   | $I_{DP}$              | Over current detection current      | 2.5~4.5A               |
|                           | tV <sub>DET3</sub>    | Detection delay time                | 10ms                   |
|                           |                       | Release condition                   | Cut load               |
| C1                        |                       | Detection condition                 | Exterior short circuit |
| Short protection          | $T_{SHORT}$           | Detection delay time                | ≤5us                   |
|                           | ·                     | Release condition                   | Cut short circuit      |
| Interior resistance       | $R_{DS}$              | Main loop electrify resistance      | VC=3.6V; RDS≤60mΩ      |

### 9.2 Parts list

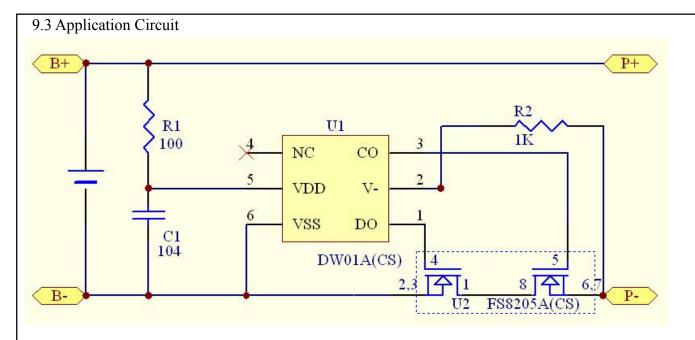

| NO. | Location | Part name             | Specification            | Pack type | Q' ty | Maker/Remark |
|-----|----------|-----------------------|--------------------------|-----------|-------|--------------|
| 1   | U1       | Battery protection IC | DW01+                    | SOT23-6   | 1     | Frotune      |
| 2   | U2       | Silicon MOSFET        | 8205                     | SOT-6     | 1     | Cansen       |
| 3   | R1       | Resistance            | SMD $100 \Omega \pm 5\%$ | 0603      | 1     | YAGEO        |
| 4   | R2       | Resistance            | SMD 1K $\Omega \pm 5\%$  | 0603      | 1     | YAGEO        |
| 5   | C1       | Capacitance           | SMD 0.1 µ F              | 0603      | 1     | TDK          |
| 6   | PCB      | Print circuit board   |                          |           | 1     |              |

#### 9.5 External Dimension Drawing

#### 10. Guarantee Period of Quality

Guarantee period of quality is 12 months after sold.

#### 11. Matters needing attention

Strictly observes the following needing attention. Data Power will not be responsible for any accident occurred by handling outside of the precautions in this specification.

### ! Danger

- Strictly prohibits heat or throw cell into fire.
- Strictly prohibits throw and wet cell in liquid such as water, gasoline or drink etc.
- Strictly prohibits use leave cell close to fire or inside of a car where temperature may be above 60 °C. Also do not charge / discharge in such conditions.
- Strictly prohibits put batteries in your pockets or a bag together with metal objects such as necklaces. Hairpins, coins, or screws. Do not store or transportation batteries with such objects.
- Strictly prohibits short circuit the (+) and (-) terminals with other metals.
- Do not place Cell in a device with the (+) and (-) in the wrong way around.
- Strictly prohibits pierce Cell with a sharp object such as a needle.
- Strictly prohibits disassemble or modify the cell.

File.No: E-SPE-0135-01

Ver:00 Page: 10/10

Date: 2017-05-23

- Strictly prohibits welding a cell directly.
- Do not use a Cell with serious scar or deformation.
- Thoroughly read the user's manual before use, inaccurate handling of lithium ion rechargeable cell may cause leakage, heat, smoke, an explosion, or fire, capacity decreasing.

### ! Warning

- Strictly prohibits put cell into a microware oven, dryer, or high-pressure container.
- Strictly prohibits use cell with dry cells and other primary batteries, or new and old battery or batteries of a different package, type, or brand.
- Stop charging the Cell if charging is not completed within the specified time.
- Stop using the Cell if abnormal heat, odor, discoloration, deformation or abnormal condition is detected during use, charge, or storage.
- Keep away from fire immediately when leakage or foul odor is detected.
- If liquid leaks onto your skin or clothes, wash well with fresh water immediately.
- If liquid leaking from the Cell gets into your eyes, do not rub your eyes. Wash them well with clean edible oil and go to see a doctor immediately.

#### ! Caution

- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Charging with specific charger according to product specification. Charge with CC/CV method. Strictly prohibits revered charging. Connect cell reverse will not charge the cel. At the same time, it will reduce the charge-discharge characteristics and safety characteristics, this will lead to product heat and leakage.
- Store batteries out of reach of children so that they are not accidentally swallowed.
- If younger children use the Cell, their guardians should explain the proper handling.
- Before using the Cell, be sure to read the user's manual and cautions on handling thoroughly.
- Batteries have life cycles. If the time that the Cell powers equipment becomes much shorter than usual, the Cell life is at an end. Replace the Cell with a new same one.
- When not using Cell for an extended period, remove it from the equipment and store in a place with low humidity and low temperature.
- While the Cell pack is charged, used and stored, keep it away from objects or materials with static electric charges
- If the terminals of the Cell become dirty, wipe with a dry clothe before using the Cell.
- Storage the cells in storage temperature range as the specifications, Afer full discharged, we suggest that charging to 3.9~4.0V with no using for a long time.
- Do not exceed these ranges of the following temperature ranges.

Charge temperature range :  $0 \,^{\circ}\text{C}$  to  $45 \,^{\circ}\text{C}$  ; Discharge temperature range :  $-20 \,^{\circ}\text{C}$  to  $60 \,^{\circ}\text{C}$  .(When using equipment)

#### 12. Statement

If our specifications material, product process or product control system has changed, the information will be transmitted to consumer by way of written with quality and reliability data.
